Archive Smarter Spend Less Stay in Control

The world's only cloud-based Tape-as-a-Service

The Storage Status Quo is Broken

As data volumes explode, most of it goes unused — but still costs a premium to store. Companies are often caught between expensive cloud storage and the operational overhead of managing on-prem infrastructure. While tape remains the gold standard for archival storage, owning and operating a tape library doesn't always align with every organization's staffing, space, or scalability needs. Meanwhile, storage budgets stretch thin as cold data continues to accumulate.

Cold data is growing. So are storage costs.

- Traditional storage options are expensive, complex, or outdated
- 70% of enterprise data goes cold within 90 days
- Cloud pricing is unpredictable and on-prem systems may not be right for your organization

A Smarter Kind of Cloud Archive

Managing long-term data storage doesn't have to be complicated or expensive. Geyser Data combines the best of tape and cloud — delivering the durability and low cost of tape with the flexibility, speed, and simplicity of a modern cloud service. It's storage that works the way you need it to.

No CapEx	S3 API Compatible	Dedicated Tapes
Only pay for what you use	Works with your cloud stack	Maximum isolation & security
Instant Retrieval	**Optional Tape Return**	**Eco-Friendly**
Tape that performs like the cloud	Maintain full control	Reduce CO2 & e-waste

What You Get with Geyser

- **No Retrieval Fees**: Access your data without surprise charges

- **Pay-Per-Use (OpEx)**: Predictable budgeting, no CapEx required

- **Dedicated Tapes**: Enterprise-class isolation & compliance via Spectra Logic hardware

- **S3-Compatible**: Seamlessly plug into cloud-native workflows

- **Physical Tape Return**: Keep long-term sovereignty of critical assets

Enterprise-Grade Infrastructure — Built for Trust

Your data is stored on the industry's most advanced tape system — the Spectra Logic enterprise tape library — deployed within the Digital Realty top-tier data center.

This ensures every customer benefits from:

- Enterprise-class performance: Optimized for speed, scalability, and reliability
- Proven physical security: ISO-certified, climate-controlled facilities
- Faster data retrieval: Built for rapid access, not cold storage delays
- True data isolation: Dedicated cartridges keep your data secure and compliant

We don't just store data.
We protect it like an enterprise should.

The Spectra Cube

Tailored for Demanding Industries

Media & Entertainment

Store massive raw footage, VFX, and post-production assets without paying high cloud prices.

Enterprise Data Archiving

Retain footage for compliance or long-term review while minimizing cost per terabyte.

Video Surveillance

Retain footage for compliance or long-term review while minimizing cost per terabyte.

Log & Compliance Archiving

Maintain long-term audit trails and application logs for regulatory and operational needs.

The Best of Both Worlds

Geyser combines the reliability of enterprise-grade tape with the simplicity of the cloud, and offers a pricing model that actually makes sense. It's a purpose-built solution for organizations that want control over their data — without the runaway costs of traditional cloud or the complexity of managing hardware.
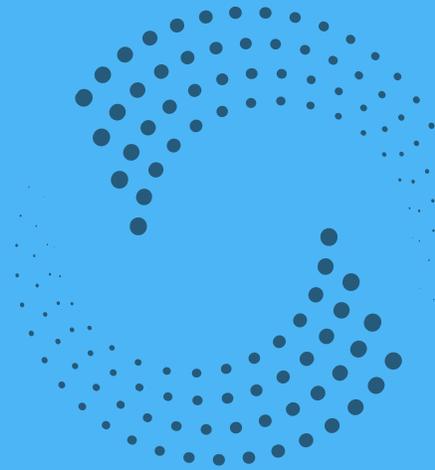

Here's how you benefit from Geyser services:
- No CapEx investment required
- No tape/library management overhead
- No migration or vendor lock-in
- No retrieval or egress fees
- S3-compatible, simple access
- Eco-conscious with low power & waste
- Scalable, secure, and future-proof

Delivering the best features across on-prem and cloud

On-Prem	AWS/GCP	Geyser Data Tape-as-a-Service
	⛔	✅ Dedicated tapes per customer
	⛔	✅ Optimal for read
	⛔	✅ No extra costs for retrieving data
	⛔	✅ Customer can get the tapes back
⛔		✅ As-a-Service
⛔		✅ Multi-Tenant
⛔		✅ Pay per usage

Geyser Data

Geyser Data specializes in Tape-as-a-Service (TaaS) solutions, offering businesses a cost-effective and eco-friendly approach to long-term data storage. By leveraging enterprise-grade tape technology within a cloud-connected framework, Geyser Data enables organizations to securely archive vast amounts of data without the complexities of traditional tape management or the hidden fees often associated with conventional cloud storage providers.

This approach ensures data durability and security and significantly reduces carbon emissions and energy consumption, aligning with sustainability goals. With seamless integration into existing workflows and a transparent pricing model free from egress or retrieval fees, Geyser Data empowers businesses across various industries to protect their valuable information efficiently and responsibly.
