Unlock Seamless Media Archiving with Tape-as-a-Service

Cost-Effective, Scalable, and Secure Archiving for the Media & Entertainment Industry

The Challenge: Managing Expansive Media Archives

In the fast-paced world of media and entertainment, organizations generate vast amounts of high-resolution content daily. From blockbuster films and television series to immersive video games and live broadcasts, the need for reliable, long-term storage solutions is paramount. Traditional storage methods often fall short, plagued by high costs, scalability issues, and complex management requirements.

Introducing Geyser Data's Tape-as-a-Service (TaaS)

Geyser Data revolutionizes media archiving with its Tape-as-a-Service solution, delivering the robustness of enterprise-grade tape storage combined with the flexibility and accessibility of the cloud. This innovative approach offers media professionals a seamless, cost-effective, and scalable solution for preserving valuable content without the burden of managing physical infrastructure.
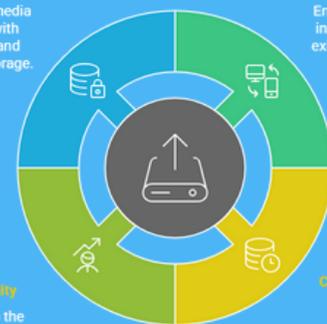

What You Get with Geyser

- **Integrated Workflows**: Seamlessly integrates with existing media asset management systems, including full compatibility with Spectra Logic's Rio Media Suite, ensuring smooth workflows from content creation to secure archiving.

- **Cost-Effective Storage**: Eliminates the high fees associated with traditional cloud storage solutions, providing a more affordable alternative for long-term data preservation.

- **Scalability**: Adapts to the evolving needs of your organization, whether you're a boutique post-production house or a major broadcasting network.

- **Secure, Long-Term Preservation**: Utilizes tape storage's inherent durability and reliability, ensuring your media assets are protected for decades.

Media Storage Solutions Benefits

Secure Preservation — Protects media assets with durable and reliable storage.

Integrated Workflows — Ensures smooth integration with existing systems for efficient operations.

Scalability — Adapts to the needs of various organizations, large or small.

Cost-Effective Storage — Provides an affordable alternative to traditional cloud storage.

Seamless Integration with Spectra Logic Solutions

Geyser Data's TaaS is an OpEx model on Spectra Logic's renowned Cube tape library, offering a fully integrated system tailored for the media and entertainment industry.

The synergy between Geyser Data and Spectra Logic's Rio Media Suite enhances media management capabilities, providing features such as:

- **Efficient Content Lifecycle Management**: Supports multi-tiered storage, ensuring data is cost-effectively stored based on its usage and importance.
- **Simple & Powerful Media Management**: Organize, group, tag, and easily locate your media assets on a unified platform.
- **Streamlined Media Migration Services**: Facilitates the seamless transition of digital media assets from outdated systems to modern, cost-effective archive infrastructures.

The Spectra Cube

Why Choose Geyser Data?

At Geyser Data, we believe that stories, creativity, and history deserve to be preserved for generations. Whether it's cinematic masterpieces, groundbreaking video games, or invaluable media archives, the content you create and manage is more than just data—it's culture, art, and business.

By combining the proven longevity of tape with the accessibility of the cloud, we ensure that your creative works remain protected, cost-effective, and instantly retrievable when you need them. With Geyser Data's Tape-as-a-Service, your content is always safe—because great stories should never disappear.

Experience the Future of Media Archiving
